EUROTHERMBENELUX

Since 1958 **we have been manufacturing customised systems to meet the painting needs of any company:** from small businesses to large industries.

For the Italian and international market we design, build and install painting systems, overseeing every phase of the industrial process.

From pre-treatment operations, such as washing and shot blasting, to the final finishing process: **the Eurotherm systems apply the most efficient and technological processes, to ensure a constant high-level result.**

Shot blasting booths

Eurotherm manufactures **customised shot blasting systems** to resolve any problem related to the shot blasting treatment of objects of all sizes.

The shot blasting booths are **designed and built according to your actual needs**, the pieces to be treated and the place where they will be placed. All our shot blasting booths are designed **to process items of any size.**

Our shot blasting **systems** are **made to measure**: we take into account the spaces, needs and objectives of our customers **to structure a product that is functional** and that responds to all processing requirements.

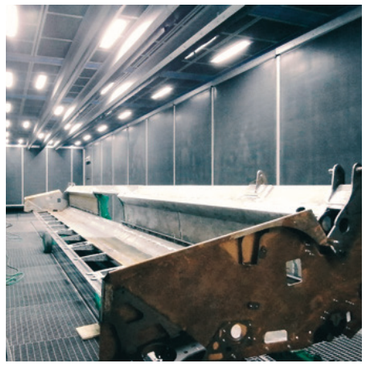

All **our shot blasting systems allow** manual **shot blasting on metal surfaces** such as **steel, aluminium and brass**, but also on **glass and ceramic.**

In particular, **the Eurotherm booths** can also be **set up to shot blast stainless steel**, equipping the system with special technical devices that avoid surface contamination of the material to be treated.

STRENGTHS

- Easy and economical maintenance.
- Maximum customisation of the booths.
- Quick assembly.
- Compliance with the EC regulations.
- Uniformly distributed lighting through LED lamps.
- Resistance and durability over time.
- Soundproofing.
- Cleaning inside the booth thanks to the constant flow of air.
- Ease of introduction of the material.
- Work environment safety.

Thanks to these constructive measures, **our shot blasting booths guarantee a functional, isolated and clean working environment** both inside and outside the work area.

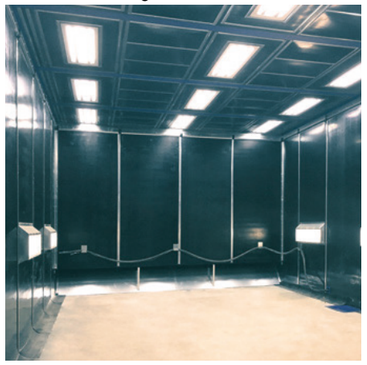

↗ Large shot blasting booths

↗ Shot blasting booths with total media recovery system

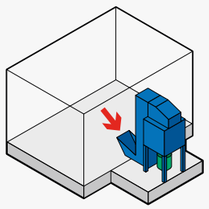

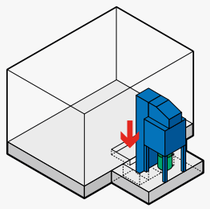

↗ Shot blasting booths with partial recovery of the media

TYPE OF ABRASIVE MEDIA RECOVERY

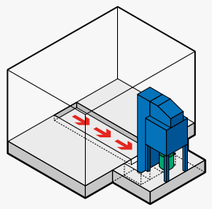

At **Eurotherm** we design shot blasting booths with **total or partial recovery of the media.** In these cases **the abrasive media** dispersed on the ground in the shot blasting booth **is recovered** and separated from coarse waste and dust, **to be reused.**

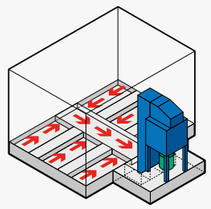

↗ **Manual recovery**
with no civil works

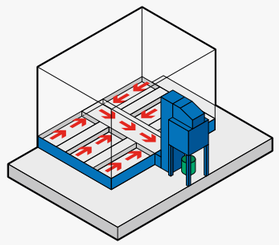

↗ **Semi-automatic recovery with loading hopper**
with localised civil works

↗ **Semi-automatic recovery with transversal screw**
with localised civil works

↗ **Automatic recovery**
with complete civil works

↗ **Automatic above floor recovery**
without civil works, with raised work platform
